

Casino 2

Casino

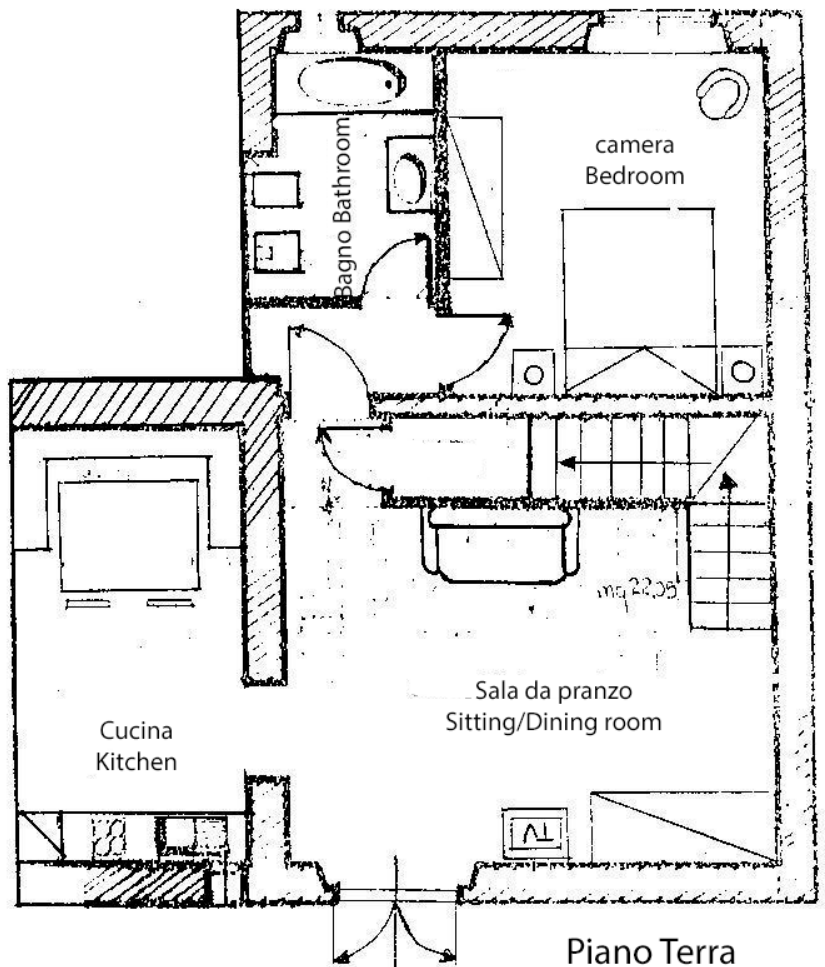

Casino is also an old country house now converted in 4 apartments. One apartment on the ground floor is the result of a new connection of an old warehouse to the than existing house. In this apartment we have kept the old bread oven which once was situated in the open. Next to this house there was a small animal shelter which as been enlarged to become a 2 bedrooms apartment on ground/first floor. Few meters up the hill is the swimming pool.
